JavaScript ES6
Node.js • Bootstrap •
MySQL
Over 2000 lines
Java • PHP • Wordpress

TOOLS

Canva • VS code
Eclipse • netbeans
GitHub • Photishop(Basics)
StarUML

EXPERIENCE

BUNJY DIGITAL | WEB DEVELOPER TRAINEE

September 2023 - Present

- ▶ Developed a **responsive website** was created for a client in the healthcare industry. As a result, there has been a **40%** increase in **website traffic**. For my part, I applied agile methodologies to develop the entire website's **front end**.
- ▶ Developed a website for a tech company to digitally brand the business. I did **front-end development** and basic **SEO** optimization for that. It was created and first functionalized using **JavaScript ES6**, **HTML**, **CSS**, and **Bootstrap**. Later, WordPress-based CMS platforms were used to develop it.

Tech stack: Javascript, Bootstrap, CSS3, WordPress, SEO - ahref

BUNJY DIGITAL | WEB DEVELOPER INTERN

June 2023 - August 2023

- ▶ Developed a user interface (**UI**) for a website that offers customers and professionals a more intelligent method to connect. Since it is an **e-commerce** website, increased site traffic has resulted in a **60%** rise in sales. Have integrated back-end **APIs** to dynamically construct the webpage.
- ▶ **Tech stack:** Javascript, Bootstrap, CSS3

PROJECTS

STUDENTS MANAGEMENT SYSTEM

- ▶ Developed a **software** called a student management system to store student data and perform operations.
- ▶ To accept **payments**, I've integrated a payment gateway using **Node.js** and **Express.js**.
- ▶ The entire **UI** was designed and developed as responsive and dynamic with **animation** effects. It has developed with **100%** efficiency and accuracy
- ▶ **Tech stack:** Node.js, Express.js, MySQL, Javascript, Bootstrap, CSS3 & HTML5

COUNTRY GUIDE WEB APPLICATION

- ▶ Developed a website where users can search by country name and can see the key information about each nation. The site operates on the basis of an integrated **API**, from which data will be fetched and displayed with **100% accuracy**
- ▶ **Tech stack :** Javascript, HTML5 & CSS3

PERSONALIZED CHATBOT

- ▶ Developed a personalized chatbot with **0 errors** and **100%** efficiency. As a key feature it will be used to get resources that are used during software development. has enabled some essential **AI** features using **API** integrations.
- ▶ **Tech stack:** Javascript, Bootstrap, CSS3 & HTML5
